

Special Olympics BC's Active Start program fills a void in our son's life. He loves playing with the equipment and it's gratifying to see the confidence he is gaining both physically and mentally as he achieves goals and does things he couldn't do before. We look forward to sharing future accomplishments thanks to Active Start.

What are Special Olympics BC's Youth Programs?

Special Olympics BC offers three programs designed to help children with intellectual disabilities to develop basic motor and sport skills through fun and positive movement experiences.

Active Start

Active Start is a family-centred activity program targeting children with intellectual disabilities ages 2 to 6. Through the program, children learn basic motor skills such as walking, running, jumping, and throwing in a fun and safe environment.

The SOBC – Victoria Active Start program is a partnership with the University of Victoria and takes place at UVic.

FUNDamentals

FUNDamentals is a continuation of the Active Start program for young athletes with intellectual disabilities ages 7 to 11. The skills transition from basic movement skills to basic sport skills, providing participants with a more in-depth introduction to sport-related motor skills along with training and competition, while maintaining an atmosphere of fun and meaningful interaction.

What are the benefits for participants?

- + Substantial and improved development of physical, cognitive, and social abilities.
- + Introduction of positive social experiences through fun play activities alongside peers.
- + Development of self-esteem and a sense of belonging.
- + Opportunities to transition into other year-round SOBC sport programs offered in 57 communities around the province, and to continue a lifelong love of sport.

Sport Start

Aimed at youth ages 12 to 18 with intellectual disabilities, **Sport Start** promotes specific sport education, proper nutrition, and social inclusion through participation in positive sport experiences. The program also builds on the athletes' existing motor skills, helping to translate those abilities into sport-specific skill development and game play.

What are the benefits for parents & caregivers?

- + Education for parents/caregivers about the value of sport in the lives of their children.
- + Education in nutrition, basic motor skills, and the Special Olympics organization.
- + Opportunities for parents/caregivers to expand their networks and support systems.
