

SD72 PARENT HOME LEARNING LESSON

COUNTING COOKIES

PURPOSE / SKILL: Counting cookies in different ways to help build understanding of numbers.

MATERIALS: 2 pages of printouts provided

INSTRUCTIONS:

STEP ONE: Look at the image of the cookies. If the cookies are only part way in the picture, decide if you will count those or not. It is up to you.

STEP TWO: Count the cookies.

Draw pictures to show 3 different ways that you counted the cookies. (ie/ by 1's? Grouping them by 2's? By 5's? Grouped by color? Shape?)

POSSIBLE NEXT STEPS: Look for other items in your house (toys... Blocks... Lego... marbles... buttons... crayons... noodles...) that you can count. Sort them into piles and count by 5's and 10's. See how many different ways you can count the objects.

How many cookies?

Name: _____

Show 3 ways to count them.

A

B

Show 3 ways to count them.
