

Problem Solving

There are 8 flowers in the garden. Some are red. Some are purple. How many of each could there be? Draw it out!

Place Value

What do you know about the number 16? How can you show it? (using base ten blocks, is it odd or even, how many ones, how many tens, where does it go on a numberline, etc.)

Addition

How many ways can you find the sum of 18 and 6?

Patterns

What do you notice? What type of pattern is this?
